Issue

A new version has been released

Version 6 of ESET Remote Administrator (ERA) and ESET business products were released in North America December 11th, 2014, and globally February 25th, 2015. This article applies to version 5.x and earlier ESET business products. For information about what's new in the latest version and how to upgrade, see the following article:

What's new in ESET version 6 business products?

Enable or disable Web control on client workstations from the ESET Remote Administrator Console, or on individual client workstations.

Details

Solution

If you do not use ESET Remote Administrator to manage your network

Perform these steps on individual client workstations.

Enable / disable Web control using Policy Manager

Disabled by default

By default, Web control is disabled on client workstations that are managed by ESET Remote Administrator.

1. Open the ESET Remote Administrator Console by clicking **Start** → A**ll Programs** → **ESET** → **ESET Remote Administrator Console** → **ESET Remote Administrator Console**.

1. Click **Tools** → **Policy Manager**. In the **Policy Manager** window select the policy you want to modify and click **Edit**.

3. Expand **Windows desktop v5** → **Web Control** → **Settings** (see Figure 1-2).

4. Click **System integration: No** and select the check box next to **Yes/No**.

4. Click **Console** → **Yes** to save your changes. These changes will be applied to client workstations the next time they check in to ESET Remote Administrator.

Enable / disable Web control on an individual client workstation

1. Open ESET Smart Security or ESET NOD32 Antivirus. How do I open my ESET product?

1. Press the **F5** key on your keyboard to access the Advanced setup window.

1. Expand **Web and email**, click **Web control** and then select the check box next to **Integrate into system**. Click **OK** to save your changes.
