Monitor clients Full Disk Encryption status

Steef | ESET Nederland - 2020-01-13 - Reacties (0) - ESET Full Disk Encryption

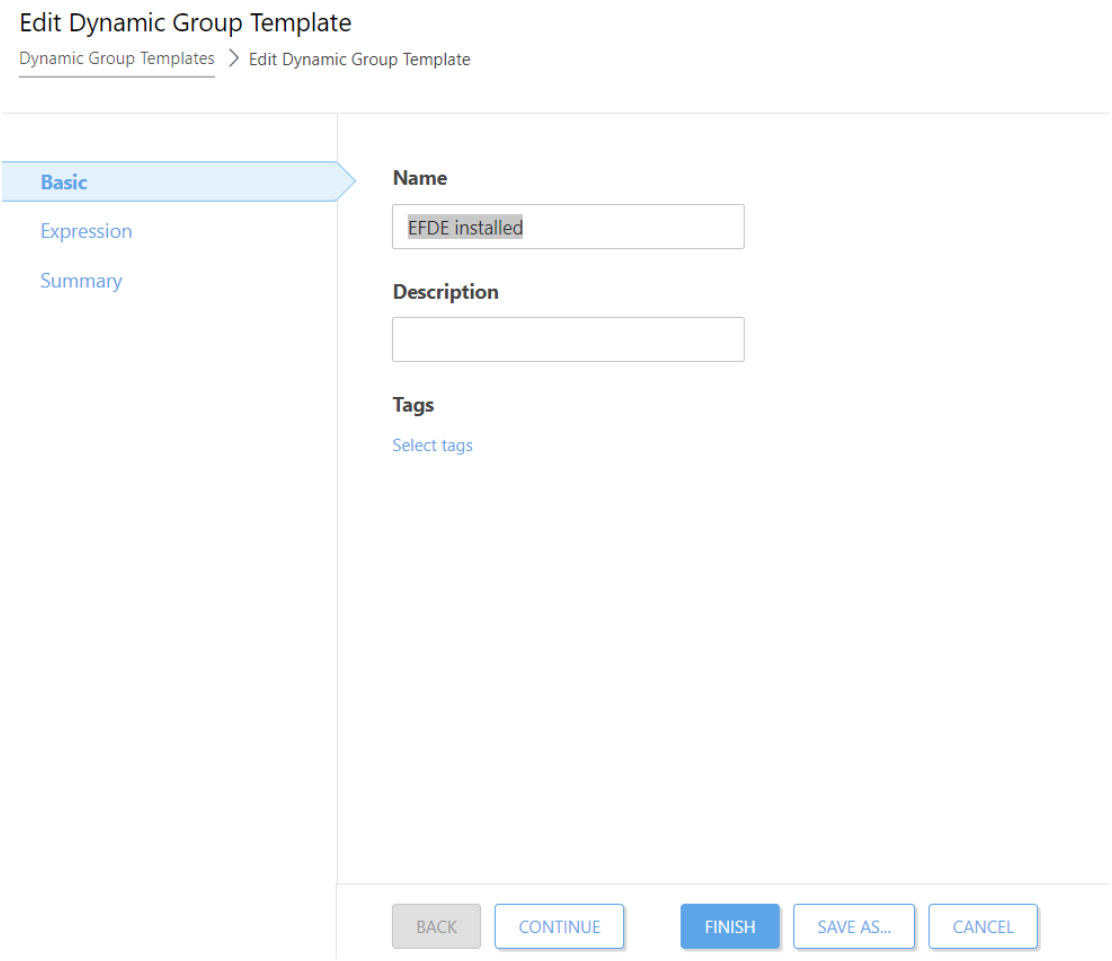
Issue:

You would like to monitor the Encryption status of your clients

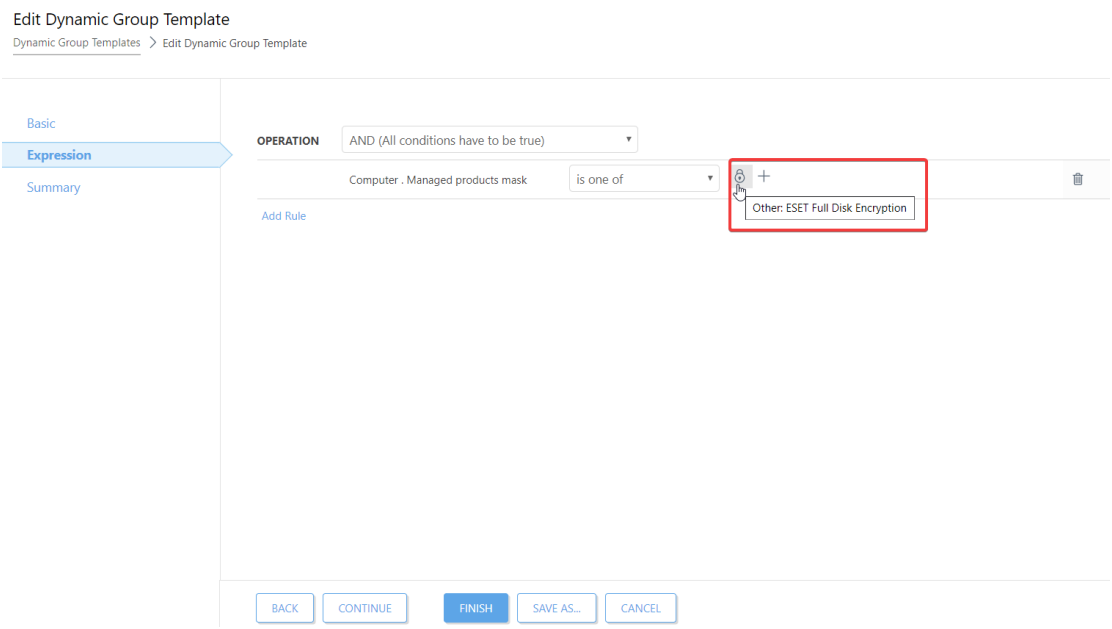
Solution:

Create the following dynamic group templates and groups in ESMC:

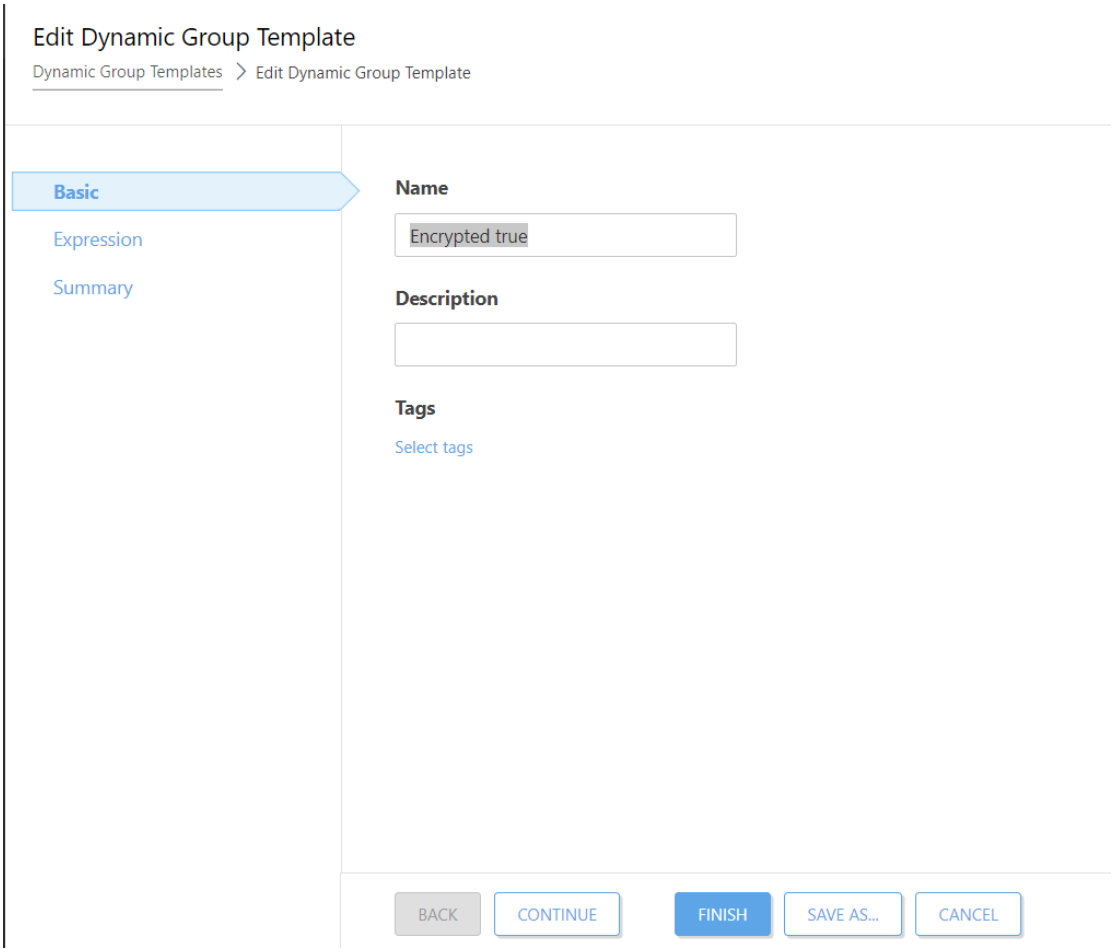
1. EFDE installed, this group checks if ESET Full Disk Encryption is installed on the client:



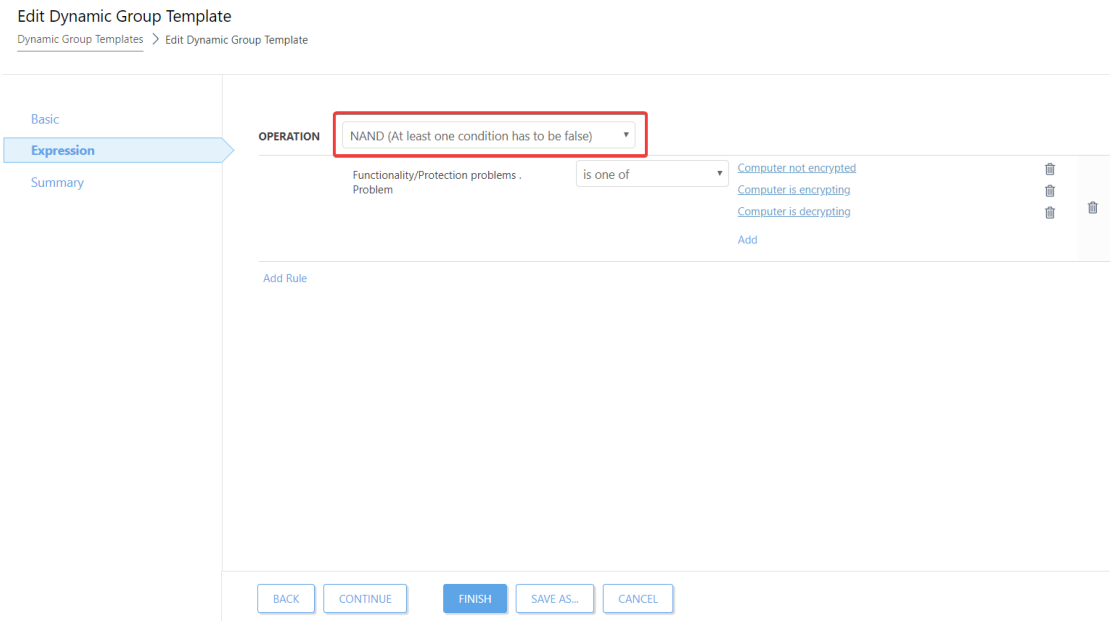
Configure the following expression:



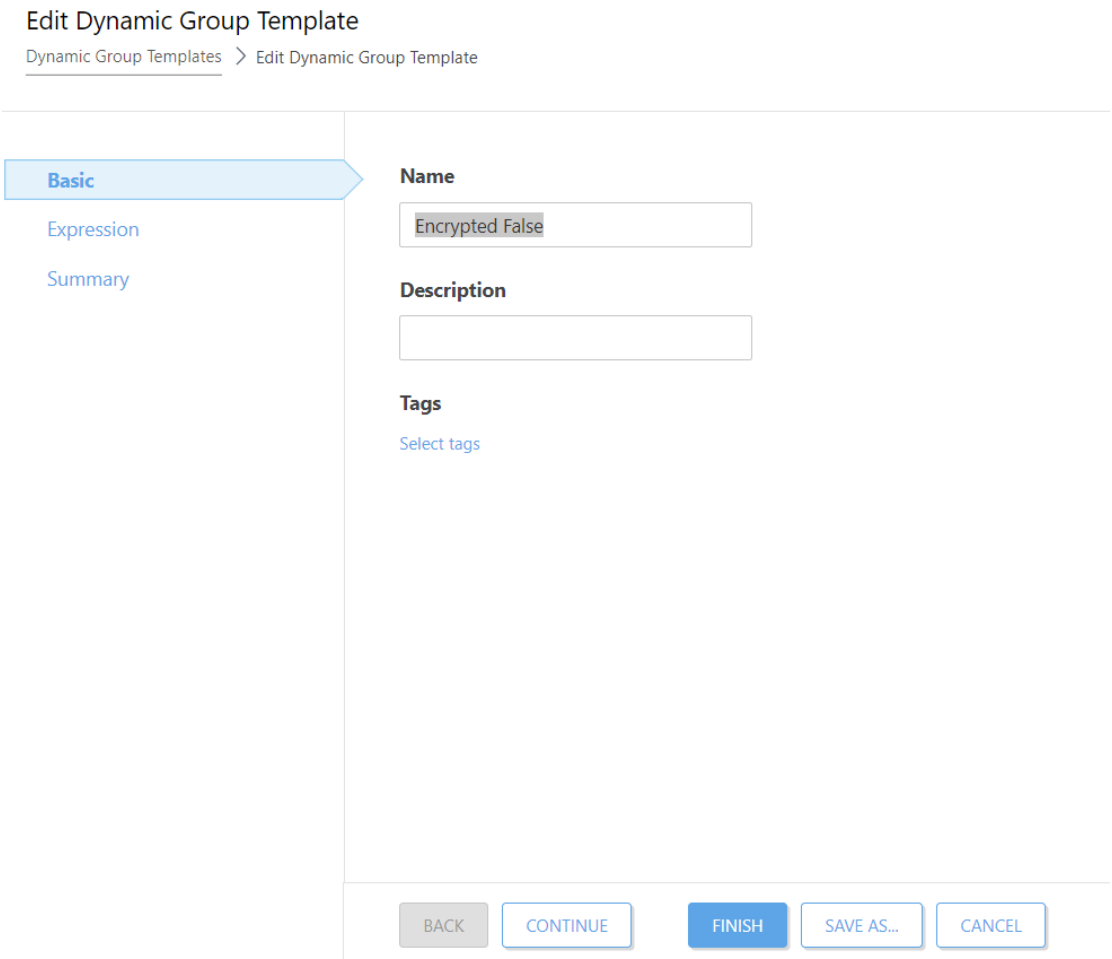
2. Create the dynamic group template , Encrypted true



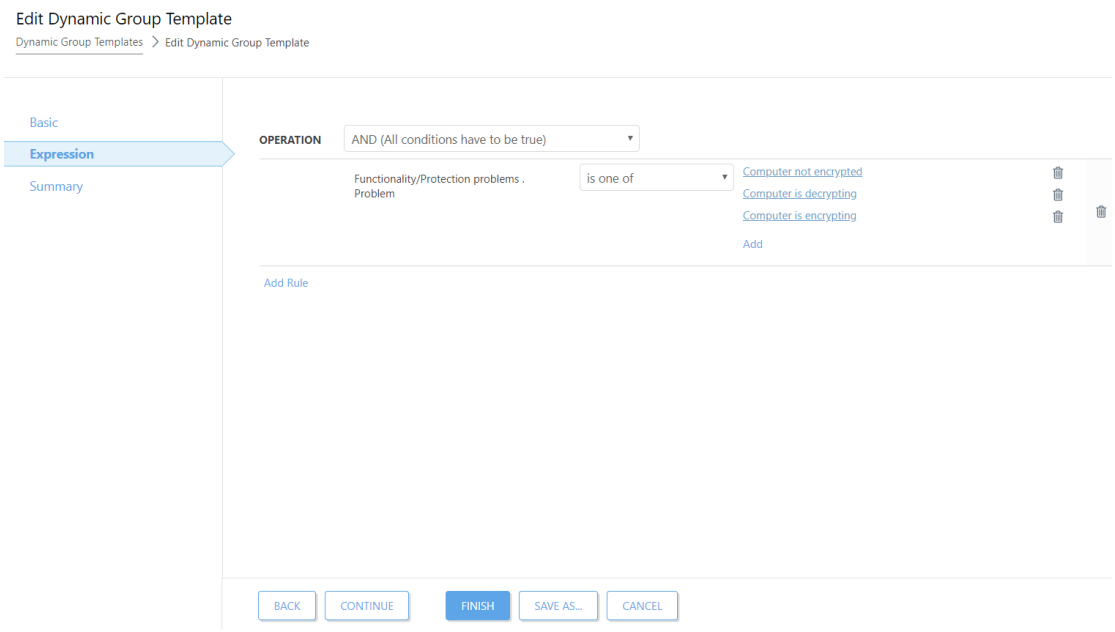
Choose for the NAND operater with the following expression:



3. Create the dynamic group template, Encryption false



Configure the following expression:



Create the dynamic groups and link the above dynamic group templates, make sure the Encryption = true and the Encryption = false are nested in the EFDE installed group. See the example below:
