ESET Endpoint Encryption Client version 5.4.6.0 has been released.

2024-12-04 - Steef | ESET Nederland - Comments (0) - Feature release

ESET Endpoint Encryption Client version 5.4.6.0 has been released.

Changelog:

- New - Improved encryption speeds with hardware support for AES-NI
- Improved - Further improvements to Full Disk Encryption performance during encryption and regular use
- Improved - Now supports Direct Storage for non-encrypted directories and disks
- Fixed - A problem where MSP licenses were appearing as expired when they were not
- Fixed - A problem where, when adding to an encrypted archive, the error message was not displayed in the correct language if the disk became full
- Fixed - When starting encryption from the ESET Direct Endpoint Management plugin Safestart would fail to be initialized
- Fixed - A problem where when ESET Secure Authentication was used on an Encrypted device using an SSO login, ESA would not prompt the user for their 2FA code
- Fixed - A problem on Windows 24H2 where a system would not shutdown

Installation Packages

- ESET Endpoint Encryption 5.4.6.0 is now available on our official download page.
