Release announcement: New ESET Direct Endpoint Management plugin for Kaseya VSA X v1.0

2025-02-13 - Steef | ESET Nederland - Reacties (0) - Feature release

We have released the new ESET Direct Endpoint Management plugin for Kaseya VSA X v 1.0. This new DEM plugin is available on our download pages.

ESET Direct Endpoint Management integration establishes direct communication between ESET security products on your managed devices and the Kaseya VSA X interface.

ESET DEM plugin for Kaseya VSA X enable MSPs to verify the ESET endpoint product installation, activation, protection, scan and threat status and perform On-demand or automated action on managed devices using Kaseya VSA X workflows(or tasks).

Main features of ESET DEM plugin for Kaseya VSA X

- Fast onboarding (install and activate) of ESET security products on your managed devices using the Kaseya VSA X interface
- Automated monitoring of ESET security product installation, activation, protection, scan and threat status
- Automated or On-demand action to remedy ESET security product-reported issues on your managed devices
