Issue

A new version has been released

Version 6 of ESET Remote Administrator (ERA) and ESET business products were released in North America December 11th, 2014, and globally February 25th, 2015. This article applies to version 5.x and earlier ESET business products. For information about what's new in the latest version and how to upgrade, see the following article:

[What's new in ESET version 6 business products?](#)

When performing a push installation to more than 20 computers, additional machines are placed into a queue
Use ESET Remote Administrator (ERA) to push install to more than 20 client workstations

NOTE:

By default, ERA will only perform up to 20 concurrent push installations at a time. Any additional push installations will be placed into a queue until a thread becomes available.

Solution

Although it is not recommended (for potential performance reasons), you can increase the maximum number of concurrent push installations to more than the default value of 20. To change this value in ESET Remote Administrator Console (ERAC), follow the steps below:

1. Open the ESET Remote Administrator Console (ERAC) by clicking **Start → All Programs → ESET → ESET Remote Administrator Console → ESET Remote Administrator Console**.
2. Click **Tools → Server Options**.

Click the image to view larger in new window

3. Click the **Advanced** tab → **Edit Advanced Settings**.

Figure 1-2

4. Expand **Remote Administrator → ERA Server → Settings → Remote Install** and select **Maximum number of concurrent push installation threads**.
5. Type your desired value into the **Value** field and then click **Console** to save your changes. When prompted to confirm, click **Yes**.

6. Click **OK** to exit the **Server Options** window.
7. [Restart the ESET Remote Administrator server service.](#)
8. After restarting the ESET Remote Administrator Server service,

you need to reconnect ERAC by clicking **File** → **Connect** in the main program window.

9. Perform your push installation:
