Activate ESET business products offline (7.x)

Anish | ESET Nederland - 2020-01-10 - Comments (0) - ESET Security Management Center

Issue

- Activation fails due to no internet connection
- A Security Admin needs an offline license file (.lf) to activate an ESET product

"Legacy" licenses

For more information about retrieving legacy license files from ESET Business Account, <u>see</u> our Online Help topic.

Solution

Using ESET Business Account, you can download offline (version 6.x and later) or legacy (version 5.x and earlier) licenses that can be used to activate products installed on a computer without an internet connection (or that cannot be activated for some other reason).

I. Create offline license file(s):

View instructions for creating an offline license in EBA and uploading it into ESMC

- 1. <u>Open ESET Security Management Web Console</u> (ESMC Web Console) in your web browser and log in.
- Click ... More → License Management → Add License and select Offline License File. Take note of the License File Token (you will need it later).

		•								•
		+ ADD LIC	REMOVE	EXPORT AS CSV						

- Select a product for this file, enter the Name of the file and its Unit count (number of seats exported to the license file).
- Select the check box next to Allow management with ESET management console and enter the ESET management console token you saved from step 2.
- 3. Click Generate.

The licenses will be displayed by category in the License Management tab.

II. Insert the offline license file during activation

To activate endpoint machines individually, follow the steps in our Knowledgebase article

To activate endpoint machines from ESMC, follow the steps in <u>our Knowledgebase</u> article and select the offline license file you created in section I.

Click to view instructions for installing and activating workstations from ESMC

- 1. View the instructions in <u>our Knowledgebase article</u> and use the settings as described in the following steps.
- 2. In the **Basic** section, give your task a **Name** and optional **Description**.

esei	SECURITY MANAGEN	IENT CENTER	Qi ∞ Search computer na QUCK LINIS ∞ 🖉 HE# ∞ A ADMINISTRATO	: 🗄
