## Activate ESET Cloud Office Security

Anish | ESET Nederland - 2020-10-30 - Comments (0) - ESET Cloud Office Security

1. Log into [ESET Business Account](#) and locate ESET Cloud Office Security tile in the Dashboard (you might need to scroll down).
2. Click Activate in the bottom-right corner of the ESET Cloud Office Security tile.

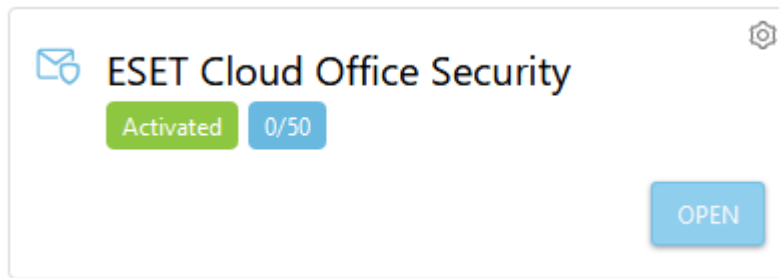

3. The activation wizard will refer to the ESET Cloud Office Security [Terms of Use](#) and display the optimal data center location based on your current location. Select I agree to the Terms of Use and click Activate. We do not recommend changing the data center location; however, if you need to use another location, you can make your selection using the drop-down menu.

A screenshot of a web-based activation wizard for 'ESET Cloud Office Security'. The window has a title bar with the text 'ESET Cloud Office Security' and a close button (X). The main content area has a heading 'Activate ESET Cloud Office Security'. Below this, there is a section for 'Data center location' with two radio button options: 'European Union (Recommended)' (which is selected) and 'United States'. Below the radio buttons, there is a paragraph of text: 'Selecting a different more distant data center may affect the quality of service. The data center location cannot be changed once ESET Cloud Office Security is activated.' At the bottom of the form, there is a checkbox labeled 'I agree to the Agreement'. In the bottom right corner of the form is a blue button with the word 'ACTIVATE' in white capital letters.

4. Click Open in the ESET Cloud Office Security tile. The ESET Cloud Office

Security [Dashboard](#) will open in a new browser tab.

When you log into ESET Cloud Office Security for the first time, a [Startup wizard](#) will appear.
