Solution

ERA User Permissions (version 6.5 and later)

This article assumes that your ERA user has the correct access rights and permissions to perform the tasks below.

If you are still using the default Administrator user, or you are unable to perform the tasks below (the option is greyed out), see the following article to create a second administrator user with all access rights (you only need to do this once):

[Create a second administrator user in ESET Remote Administrator 6.5 and later](#)

1. [Open the ESET Remote Administrator Web Console \(ERA Web Console\)](#) in your web browser and log in.
2. Click **Computers**  and select the Static Group to which you want to add a computer (visit the following ESET Online Help topic for step-by-step instructions [to create New Static Group](#)).
3. Click **Add New -> Computers**.

Click the image to view larger in new window

4. In the **Add Devices** window, type the hostname or IP address of

the computer you want to add into the **Names** field and then click **Add**.
