## Add or remove password protection of ESET security product settings from ESET PROTECT (8.x)

Steef | ESET Nederland - 2021-04-23 - Comments (0) - Legacy

### Issue

- [ESET security product settings are not password-protected on client workstations](#)
- [ESET security product settings are password-protected on client workstations](#)

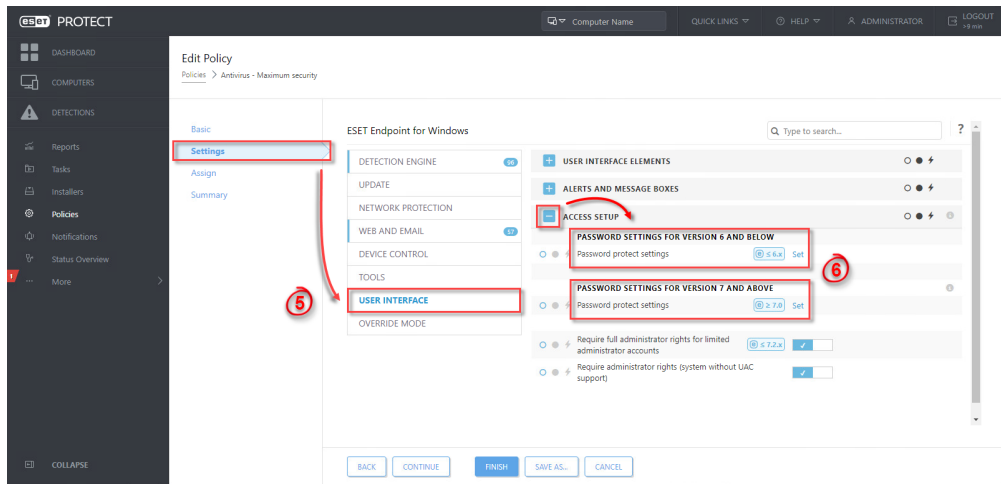

### Solution

Add password protection

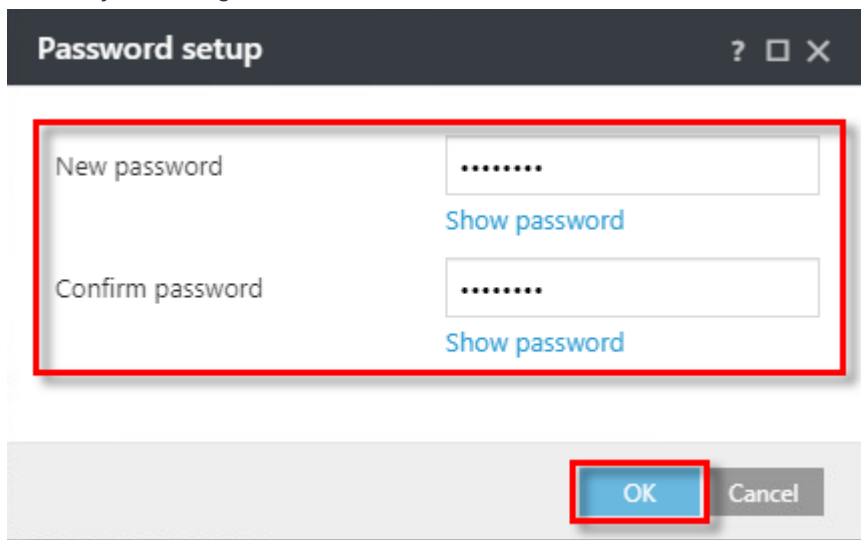

1. [Open the ESET PROTECT Web Console](#) in your web browser and log in.
2. Click **Policies** and select the desired **Built-in policy**.
3. Select the policy that you want to modify.
4. Click **Actions** → **Edit**.

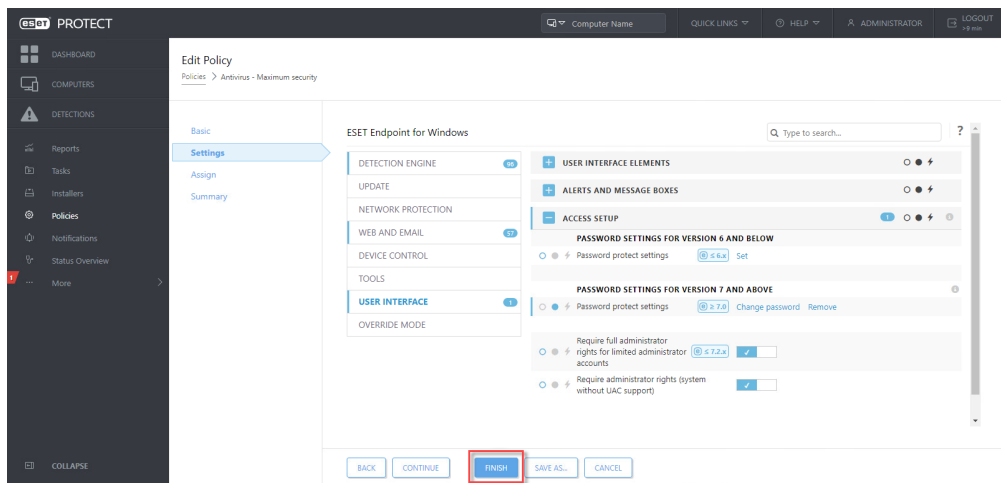

5. Click **Settings**, then click **User Interface**.
6. Expand the **Access Setup** menu. Click **Set** next to Password Settings for your version of Endpoint.

7. Type the password in the **New password** and **Confirm password** fields. Click **OK** to save your changes.

8. Click **Finish** to save your changes. Client computers [Create a new policy in ESET PROTECT](#) will receive the changes the next time they log in to the ESET PROTECT Server.

## Remove password protection

1. [Edit the policy.](#)
2. Click **Settings** → **User Interface** → **Access Setup**.
3. Under **Password Settings**, click **Remove**. Verify that the dot next to Password Settings is blue. Click **Finish**.
