Apple iOS and OS X SSL Security Exploit- How can I protect my devices?

Ondersteuning | ESET Nederland - 2017-11-28 - Comments (0) - MDM for iOS

<https://support.eset.com/kb3498>

Issue

An exploit in Apple iOS and OS X operating systems can lead to the insecure transfer of data when connecting to secure websites (SSL-protected) such as online banks and webmail

Solution

ESET recommends that you update all Apple iOS and OS X devices to the latest operating system version as soon as possible to best defend against this exploit.

[Visit Apple Support to download the latest version of OS X](#)
[Is there an ESET solution available for Windows Phone and Apple iOS \(iPhone, iPad, iPod Touch\)?](#)
