## Configure ESET Remote Administrator to automatically deploy ESET endpoint products to unprotected computers (6.x)

Ondersteuning | ESET Nederland - 2025-03-07 - Comments (0) - 6.x

<https://support.eset.com/kb3702>

### Issue

---

Configure a dynamic group that identifies client computers not protected by ESET endpoint products

Configure an automated task to deploy ESET endpoint products to unprotected computers

### Solution

---

#### Permissions changes in ESET Remote administrator 6.5 and later

Before proceeding, please note important changes to user access rights and permissions in the latest versions of ESET Remote Administrator.

[View Permissions Change](#)

## I. Create New Dynamic Group

A user must have the following permissions for their home group:

<b>Functionality</b>	<b>Read</b>	<b>Use</b>	<b>Write</b>
Groups & Computers	✓	✓	✓

Once these permissions are in place, follow the steps below.

1. [Open ESET Remote Administrator Web Console](#) (ERA Web Console) in your web browser and log in.
2. Click **Computers** .
3. Select the parent static group that you want the new group to be under, click the gear icon and then select **New Dynamic Group** from the context menu.

**Figure 1-1**

**Click the image to view larger in new window**

4. Type a name for the group into the **Name** field. If necessary, configure the **Description** and **Parent Group** settings to your preferences.

**Figure 1-2**

**Click the image to view larger in new window**

5. Expand **Template** and click **New**.

**Figure 1-3**

**Click the image to view larger in new window**

6. Type a name into the **Name** field.

**Figure 1-4**

- Expand **Expression**, select **NOR (All conditions have to be false)** from the **Operation** drop-down menu and then click **Add Rule**.

**Figure 1-5**

**Click the image to view larger in new window**

- Expand **Installed software**, select **Application name** and then click **OK**.

**Figure 1-6**

- Select **has prefix** from the drop-down menu, enter **ESET Endpoint** or **ESET File** (depending on which product you want automatically deployed to client workstations in this dynamic group) and then click **Finish**.

**Figure 1-7**

- Click **Finish** and proceed to part II.

## II. Create a new Client Task to deploy ESET endpoint products to unprotected clients

A user must have the following permissions for each affected object:

<b>Functionality</b>	<b>Read</b>	<b>Use</b>	<b>Write</b>
Groups & Computers	✓	✓	✓

A user must have the following permissions for their home group:

<b>Functionality</b>	<b>Read</b>	<b>Use</b>	<b>Write</b>
Software Install (under Client Tasks)	✓	✓	✓

Once these permissions are in place, follow the steps below.

1. Click **Admin**  → **Client Tasks**.
2. Expand **ESET Security Product**, select **Software Install** and then click **New**.

**Figure 2-1**

**Click the image to view larger in new window**

3. Type a name for the task into the **Name** field (configure the other settings in the **Basic** section as necessary).
4. Expand **Settings**, select the check box next to **I agree with application End User License Agreement** and then click **Choose ESET License**. Please note that **you will add Targets after the task is created**.

**ESET Remote Administrator version 6.2.11 and earlier:**

Adding targets is done during task creation (for example, after adding a new task and giving it a **Name**, click **Target** to add groups or clients to the task).

**Figure 2-2**

**Click the image to view larger in new window**

5. Select a valid license and click **OK**.
6. Click **Choose Package**.
7. Select the product you want to deploy and click **OK**.

**Figure 2-3**

**Click the image to view larger in new window**

8. Click **Finish** when you are finished making changes to your task.
9. Click **Create Trigger** when you are asked whether you want to

add a trigger for the client task.

**Figure 2-4**

10. Expand **Targets**. Click **Add groups** and select the check box next the dynamic group you created in part I. Click **OK**.

**Figure 2-5**

**Click the image to view larger in new window**

11. Expand the **Trigger** section and select **Joined Dynamic Group Trigger** from the **Trigger Type** drop-down menu.

**Figure 2-6**

**Click the image to view larger in new window**

12. Click **Finish**.
