## Create a second Administrator in ESET PROTECT Cloud Web Console

Lesley | ESET Nederland - 2022-08-29 - Comments (0) - ESET PROTECT On-prem

### Issue

- You want to create a second Administrator in ESET PROTECT Cloud

### Solution

To create a second Administrator in ESET PROTECT Cloud, you need to select Custom Access rights for ESET PROTECT Cloud when creating or editing the user in ESET Business Account.

- Log in to [ESET Business Account](#).
- [Create a new ESET PROTECT Cloud user](#) that needs Administrative access.

Alternatively, you can edit the existing user. Click **User management**, hover the mouse cursor next to the name of an existing user and click the menu (three vertical dots) icon →

### Edit.

- In the **Access Rights** section:

- In the **Company access** section, select **Write**.
- In the **ESET PROTECT Cloud access** section, select **Custom**.

- In the **ESET Cloud Office Security access** section, select **Write**.

**ACCESS RIGHTS** ▾

Company access

- Write**  
User has full access.
- Read  
User can only view collected data.
- Write  
User has full access and can create and execute actions.
- Read  
User can only view collected data and generate reports in ESET PROTECT Cloud.

ESET PROTECT Cloud access

- Custom** i  
User access is defined in ESET PROTECT Cloud.  
[Instructions to define the permission set](#)
- No access  
User is not able to access ESET PROTECT Cloud.

ESET Cloud Office Security access

- Write**  
User has full access to ESET Cloud Office Security.
- Read  
User can only view collected data in ESET Cloud Office Security.
- No access  
User is not able to access ESET Cloud Office Security.

4. Click **Create** to create a new user profile.

5. [Open ESET PROTECT Cloud Web Console](#) in your web browser and log in.

6. Click **More** → **Users**.

7. Click **Add New**.

8. Click **Select** next to the **Account identifier** field. In the **Please select item** window, select the check box next to the user that was created in ESET Business Account and click **OK**. Click **Continue**.

9. In the **Permission Sets** section, select the check box next to **Administrator permission set** in the **Unassigned (Available) Permission Sets** section. Review the **Selected Permission Set details** and click **Finish**.
