## Deploy or upgrade ESET endpoint products using ESET Remote Administrator (6.x)

Ondersteuning | ESET Nederland - 2017-12-04 - Comments (0) - 6.x

<https://support.eset.com/kb3605>

### Issue

---

Upgrade ESET Endpoint Security or ESET Endpoint Antivirus to the latest version

Deploy ESET solutions to clients remotely using the software install task or Live Installer method

### Solution

---

#### Getting Started with ERA: Step 5 of 6

← [Deploy ERA Agent](#) | [Post installation tasks](#) →

#### Permissions changes in ESET Remote administrator 6.5 and later

Before proceeding, please note important changes to user access rights and permissions in the latest versions of ESET Remote Administrator.

[View  
Permissions](#)

[s](#)  
[Cha](#)  
[nge](#)  
[s](#)

A user must have the following permissions for their home group:

[Vie](#)  
[w](#)  
[per](#)  
[mis](#)  
[sion](#)  
[s](#)

Once these permissions are in place, follow the steps below.

1. [Open ESET Remote Administrator Web Console](#) (ERA Web Console) in your web browser and log in.
2. Click **Admin**  → **Client Tasks** → **Operating system** → **Software install** → **New**.

**Figure 1-1**

**Click the image to view larger in new window**

3. In the **Basic** settings section, give your installation task a **Name** and optionally a **Description**. The **Task** drop-down menu will automatically be set to **Software Install**.

**Figure 1-2**

**Click the image to view larger in new window**

4. Expand the **Settings** section and select the check box next to **I agree with application End User Agreement**.

### Linux installations

You can add the **--skip-license** parameter to the **Installation Parameters** field to skip the display of

the ESET End-user license agreement (EULA). If you wish to view the EULA before agreeing to it, do not use this parameter.

### ESET Remote Administrator version 6.2.11 and earlier:

Adding targets is done during task creation (for example, after adding a new task and giving it a **Name**, click **Target** to add groups or clients to the task).

5. If you are installing a new product, click **<CHOOSE ESET LICENSE>**, select the license that you want to use to activate ESET products that will be sent to client computers and then click **OK**. If you are running an upgrade installation on a previously activated product, do not select the license. If you have not yet added product licenses, [click here for instructions to add product licenses in ERA](#).

**Figure 1-3**

6. Under **Package to install** there are two options to select the package that will be installed on target clients:
  - a. To install a package from the repository, click **<CHOOSE PACKAGE>**, select the ESET product that you want to install on client computers and then click **OK**. [Do I have the latest version of ESET business products?](#)

**Figure 1-4**

**Click the image to view larger in new window**

- b. To install a package by entering the target URL, select **Install by direct package URL** and type the package URL into the corresponding field. [Do I have the latest version of ESET business products?](#)
  - c. Select the check box next to **Automatically Reboot**

## When Needed.

**Figure 1-5**

**Click the image to view larger in new window**

7. Expand the **Summary** section to view details about your software install task. Click **Finish** to complete creation of the task.

**Version 6.2 and earlier:** The new task will be displayed in the **Client tasks** pane. Select the task and click **Details** → **Executions** to verify that the task is running. The status column will display **Finished** when remote installation is complete on a given client computer.

**Figure 1-6**

**Click the image to view larger in new window**

8. When prompted, click **Create Trigger** to add targets for this task, and to automate this task when certain triggers are met (optional).

**Figure 1-7**

9. Type a name for the trigger into the **Trigger description** field.

**Figure 1-8**

**Click the image to view larger in new window**

10. Expand **Target** and click **Add computers** or **Add groups**, depending on your preference.

**Figure 1-9**

**Click the image to view larger in new window**

11. Select the check box(es) next to the computer(s) or group(s) you want to send this task to and click **OK**.

**Figure 1-10**

**Click the image to view larger in new window**

12. Expand **Trigger** and select your desired option from the **Trigger Type** drop-down menu and click **Finish**.

**Figure 1-11**

**Click the image to view larger in new window**

13. [Send an activation task](#) to the computers on which you installed ESET endpoint products so that they can begin receiving regular updates.
- 
13. If you are performing a new installation of ERA, proceed to Step 6, [post installation tasks](#).
