Do you receive errors when accessing the Web interface of ESET File/Mail/Gateway Security?

Ondersteuning | ESET Nederland - 2017-10-31 - Comments (0) - Legacy

If you are attempting to access the web interface of *ESET File/Mail/Gateway Security* and an error is written to the log file, such as:

```
Child process wwwi [2011] terminated with return code 64, won't be restarted
```

Please review the information below:

Verify that you have entered a valid username/password for the web interface in the `[wwwi]` section of the `/etc/esets/esets.cfg` configuration file:

Username and password must be set.

Additional information on ESET Mail/File/Gateway Security can be found in [our manuals](#) website:
