Enable ESET LiveGuard Advanced on your endpoint computer in ESET PROTECT Cloud

Mitch | ESET Nederland - 2022-08-29 - Comments (0) - Endpoint Solutions

Issue

- Increase the level of protection of your environment with ESET LiveGuard Advanced (formerly ESET Dynamic Threat Defense)
- Submit suspicious samples to be executed and analyzed in a cloud sandbox, an isolated test environment

Solution

- 1. Import your ESET LiveGuard Advanced license into ESET Business Account
- 2. Synchronize ESET PROTECT with your ESET Business Account
- 3. Activate ESET LiveGuard Advanced license on your endpoint computers
- 4. Enable ESET LiveGuard Advanced license on your endpoint computers

I. Import your ESET LiveGuard Advanced license into ESET Business Account

In your web browser, open ESET Business Account and log in.

Click Licenses \rightarrow Enter license key. If you already have a license in your ESET Business Account, click Add License \rightarrow Enter license key.

Type or copy/paste your license key and click Add License.

Select the check box next to I agree to the ESET Terms of Use and click Verify.

Add License	×
License Advanced. ESET LiveGuard Advanced rest in the company.	contains ESET LiveGuard ults are shared with all computers
Please review and agree to the Terms of t	use to continue.
	VERIFY

II. Synchronize ESET PROTECT with your ESET Business Account

<u>Open ESET PROTECT Cloud Web Console</u> in your web browser and log in.

Click **More** \rightarrow **License Management** \rightarrow **Actions** \rightarrow **Synchronize Licenses**. Wait for the synchronization to finish. Your ESET LiveGuard Advanced license will appear in your licenses with the number of free seats.

III. Activate ESET LiveGuard Advanced license on your endpoint computers

Open ESET PROTECT Cloud Web Console in your web browser and log in.
