Solution

A new version has been released

Version 6 of ESET Remote Administrator (ERA) and ESET business products were released in North America December 11th, 2014, and globally February 25th, 2015. This article applies to version 5.x and earlier ESET business products. For information about what's new in the latest version and how to upgrade, see the following article:

[What's new in ESET version 6 business products?](#)

ESET recommends that you only enable pre-release updates in situations when a pre-release update will resolve an issue you are having with your ESET product. Once you have received the update that resolves your issue, we recommend that you revert back to regular updates.

Method 1: Enable pre-release updates using ESET Remote Administrator

1. Open the ESET Configuration Editor by clicking **Start → All Programs → ESET → ESET Remote Administrator Console → ESET Configuration Editor**.

2. Expand **Windows desktop v5 → Update Profile Settings →** and then click **Pre-release updates**.

3. Click the "Value" check box.

Method 2: <u>Enable pre-release updates on client workstations</u>

1. Open ESET Endpoint Security or ESET Endpoint Antivirus. <u>How do I open my ESET product?</u>

2. Press the F5 key to open the **Advanced setup window**.

3. Expand **Update** and then click **General**.

4. Select **Pre-release update**.
