Error "A Javascript Error has occured" is displayed after upgrading Enterprise Server

Anish | ESET Nederland - 2018-01-23 - Comments (0) - ESET Endpoint Encryption

The Javascript error message is displayed because your browser has cached some of the older Enterprise Server files.

Simply do a full refresh of your browser. Click the **Refresh** button or press **CTRL-F5** on most browsers.

Once the browser has refreshed, the problem should be permanently cleared.
