Error: Failed to delete: The user cannot be deleted (0xC01305ED)

Anish | ESET Nederland - 2018-01-23 - [Comments \(0\)](#) - [ESET Endpoint Encryption](#)

Problem

When trying to delete a User from your Enterprise Server, you see the following error message:

Failed to delete: The user cannot be deleted at this time because their licence is still being downloaded. This could be as a result of licence resync event.
(0xC01305ED)

Cause

A likely reason for experiencing the error above, is due to a recent licence resync event.

Solution

To resolve this issue, follow the article below ensuring you tick the box that states "Perform a full resync when this window is closed" (see below screenshot). Once you have completed this, you will be able to delete the desired User from your Enterprise Server.
