Error resetting the key-file password for a managed user
Anish | ESET Nederland - 2018-01-23 - Comments (0) - ESET Endpoint Encryption

## **Problem**

When trying to reset the key-file password for a managed user with Single Signon by following <u>KB86 - How do I reset a users DESlock+ Key-File password?</u> you will see this error dialog stating:

Failed Deactivating: The user cannot be deactivated from the end-point at this time because they have a Full Disk Encrypted (FDE) pre-boot login configured to use SSO, or their login is in a pending state. (0xC01305EE)

## Solution

To resolve this issue follow this article:

KB381 - How to reset the key-file password on systems using SSO FDE (managed)

keywords:0xC01305EE, error, SSO, key-file, passowrd
