Error "This copy of windows is not installed on the Primary Boot drive" displayed when starting Full Disk Encryption

Anish | ESET Nederland - 2018-02-12 - Comments (0) - ESET Endpoint Encryption

If the error message above is displayed when starting Full Disk Encryption it is likely that you are running Windows 8 with UEFI and Secure Boot.

DESlock+ supports Full Disk Encryption of Windows 8 machines configured with UEFI and Secure Boot, starting with Version 4.7.4. Please check the version of DESlock+ you have installed and upgrade if necessary.

Please see the [DESlock+ Client Download Page](#) to obtain the latest version.

If the problem persists, please contact DESlock+ support by creating a [Support Ticket](#)
