Issue

You receive notifications that files have been quarantined on client workstations, but the **Quarantine** tab in ESET Remote Administrator Console does not display these files.

Details

Solution

1. Open the ESET Remote Administrator Console (ERAC) by clicking **Start** → **All Programs** → **ESET** → **ESET Remote Administrator Console** → **ESET Remote Administrator Console**, or by double-clicking the ERAC icon on your desktop.
2. Click **Tools** → **Server Options**, click the **Advanced** tab and then click **Edit Advanced Settings**.

3. Expand **Advanced**, select **Scheduling options for less frequent internal tasks** and then click **Edit**.
4. Enter a lesser value (for example 30) in the **Frequency** field to increase the frequency with which the ERAC refreshes quarantine entries and click **OK**. ERAC may exhibit slower performance once this value is modified, for this reason we recommend that you lower it incrementally until you are satisfied with quarantine reporting and overall performance.
