Export logs to Syslog server from ESET Security Management Center (7.x)

Anish | ESET Nederland - 2020-07-14 - Comments (0) - SIEM Integration

Issue

- ESET Security Management Center version 7.x is able to send notifications to your Syslog server
- Export Threat events, Firewall Aggregated events, HIPS Aggregated events, Audit events, Enterprise Inspector alert events

Solution

ESET Security Management Center (ESMC) 7 User Permissions

This article assumes that your ESMC user has the correct access rights and permissions to perform the tasks below. If you are still using the default Administrator user, or you are unable to perform the tasks below (the option is grayed out), see the following article to create a second administrator user with all access rights (you only need to do this once): [Create a second administrator user in ESET Security Management Center 7.x](#)

[View permissions needed for least privilege user access](#)

A user must have the following permissions for their home group:

Functionality	Read	Use	Write
Server Settings	✓	✓	✓

Once these permissions are in place, follow the steps below:

1. [Open ESET Security Management Web Console](#) (ESMC Web Console) in your web browser and log in.
2. Click **More** → **Server Settings** and expand **Advanced Settings**.
