How do I add a new client licence to my Enterprise Server?

Anish | ESET Nederland - 2018-01-24 - Comments (0) - ESET Endpoint Encryption

Note: If you haven't yet setup your Enterprise Server, then please follow this article first:

KB119 - How do I set up my Enterprise Server?

To add a new client licence to your Enterprise Server follow the procedure below:

Login to the Enterprise Server.
Click the **Organisation:** link in the left hand tree view.
Click the **Licences** tab.
Click the **Add** button.

Enter a **Description** for your own reference to describe the licence being added.
Enter the **Product ID** and **Product Key** information from your licence purchase email, then click the **Next** button and complete the wizard.

After the wizard is closed, the licence will be displayed in the list of available licences.
