How do I change a Full Disk Encryption username (managed)

Anish | ESET Nederland - 2018-01-24 - Comments (0) - ESET Endpoint Encryption

To manually change a full disk encryption (FDE) login username:

Select the User's **Workstation Details** in your Enterprise Server.
'Click' the **FDE Logins** tab.

Select the User and click **Change.**

Change the **FDE Login Username.**
Click **Post Change.**
You will then be required to **Enterprise Sync** from the client machine for the change to take effect.
