Install ESET Mobile Security Business Edition directly to your Windows Mobile device

> ## Important!
> Save all open documents and exit all running applications before installing on your mobile device.

1. To install ESET Mobile Security Business Edition directly to your device, click the appropriate link below to download the.cab installation file by WiFi, Bluetooth file transfer, or

email attachment (its purpose is similar to that of an .msi package on your PC):

- Should I download the Smartphone or PocketPC version?

NOTE:

You will need your unique username and password to download ESET Mobile Security Business Edition; reference your confirmation email for this information. If you have not yet purchased a license or received your username and password, contact your local ESET distributor or click here to contact ESET Sales.

---

1. After downloading, tap **Start → File Explorer** to locate the .cab file. Tap the .cab file to launch the installer and follow the prompts in the Installation Wizard.

   Important!

   User interface varies by device and the installation file may appear in a different menu or folder on your device.

2. After the installer runs, tap **Accept** to agree to the End User License Agreement (EULA).

Figure 1-1

3. When installation is complete, tap **OK** to exit the installation.

Figure 1-2

4. Then, activate ESET Mobile Security.
5. After activating you can modify the program's parameters. However, the ESET Mobile Security Business Edition default configuration provides the optimal level of protection against malicious programs.

Install ESET Mobile Security Business Edition to your Windows Mobile device via computer

1. To install ESET Mobile Security Business Edition using your computer (i.e., Active Sync in Windows XP or Windows Mobile Device Center in Windows Vista/WIndows 7), download and run the installation package (.exe file) below on the computer to which your mobile device is connected.
