How do I get an Enterprise Server Proxy ID?

Anish | ESET Nederland - 2018-01-30 - Comments (0) - ESET Endpoint Encryption

If you do not have an Enterprise Server Proxy ID, you can obtain it in one of two ways:

1. You can contact DESlock+ and request a trial by clicking the link below and either filling in the form requesting an Enterprise Server Proxy ID or you can use the contact details to the right of the screen.

<http://www.deslock.com/contact.php>

2. If you are an ESET Customer, please contact your ESET Representative or ESET Reseller who will be able to provide you with a Proxy ID or alternatively click the link above and let us know who you have bought or are trialling the Enterprise Server from and we will contact them to get a Proxy ID you to as soon as possible.
