Issue

Manage ESET Virtualization Security (EVS) using an ESET Remote Administrator (ERA) policy

Manage EVS using an ERA task

Solution

[Create a policy](#)

[Create a task](#)

Create a policy for your virtual machines

1. Open ESET Remote Administrator Web Console (ERA Web Console) in your web browser and log in. [How do I open ERA Web Console?](#)

2. Click **Admin**  → **Policies** → **Policies** and then click **New**.

Execute a task for virtual machines running EVS

Four tasks can be assigned to EVS clients using ERA. In this example, we look at how to create an on-demand scan task. [Click here for more information on how to create EVS-specific tasks.](#)

1. Open ESET Remote Administrator Web Console (ERA Web Console) in your web browser and log in. [How do I open ERA Web Console?](#)
2. Click **Admin**  → **Client Tasks** → **ESET Security Product** → **On-**

Demand Scan and then click **New**.

Figure 2-1

Click the image to view larger in new window

3. In the **Name** field, type a name for your new task. In the **Task Category** drop-down menu, select **ESET Security Product**. In the **Task** drop-down menu, select **On-Demand Scan**.

Figure 2-2

Click the image to view larger in new window

4. Expand **Settings**, select the scan parameters for your on-demand scan (in this example, the computer will shut down after an in-depth scan has been performed) and click **Finish**.

Figure 2-3

5. Click **Create Trigger**.

Figure 2-4

Click the image to view larger in new window

6. In the **Trigger Description** field, type a name for your new trigger.

Figure 2-5

Click the image to view larger in new window

7. Expand **Target** and click **Add Computers**.

Figure 2-6

Click the image to view larger in new window

8. Select the group your target clients belong to, select the check box(es) next to your target clients and click **OK**.

Figure 2-7

Click the image to view larger in new window

9. Expand **Trigger**, select the trigger parameters for your on-demand scan (in this example, the scan will begin as soon as possible using the machine's local time) and click **Finish**. Your

new task will be displayed in the list of tasks on the right and will run at the time you specified.
