

# Install ESET Endpoint Antivirus for macOS on a client workstation (7.x)

Mitch | ESET Nederland - 2022-11-29 - [Comments \(0\)](#) - [Endpoint Solutions](#)

## Issue

- Users will not be able to download the installer file for ESET Endpoint Antivirus for macOS version 7 from the ESET website
- You can install ESET Endpoint Antivirus for macOS version 7 via the software install task in ESET PROTECT
- ESET PROTECT Cloud users can create and download a Live installer package with ESET Management Agent and ESET Endpoint Antivirus version 7 for macOS

## Solution

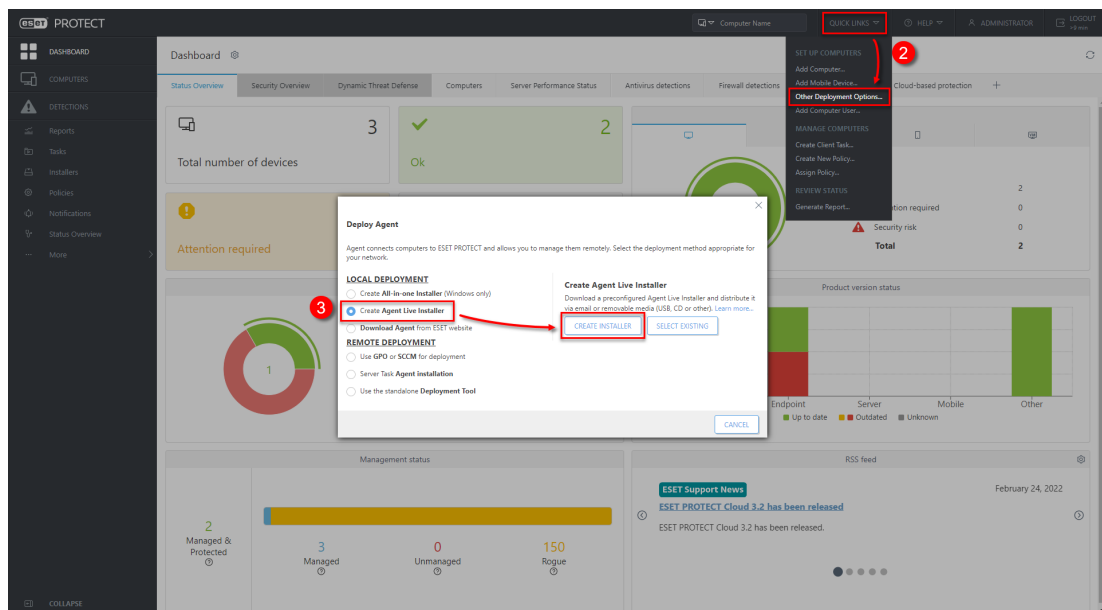

I. [Create ESET Management Agent Live Installer in ESET PROTECT](#)

II. [Install ESET Management Agent on your macOS computer](#)

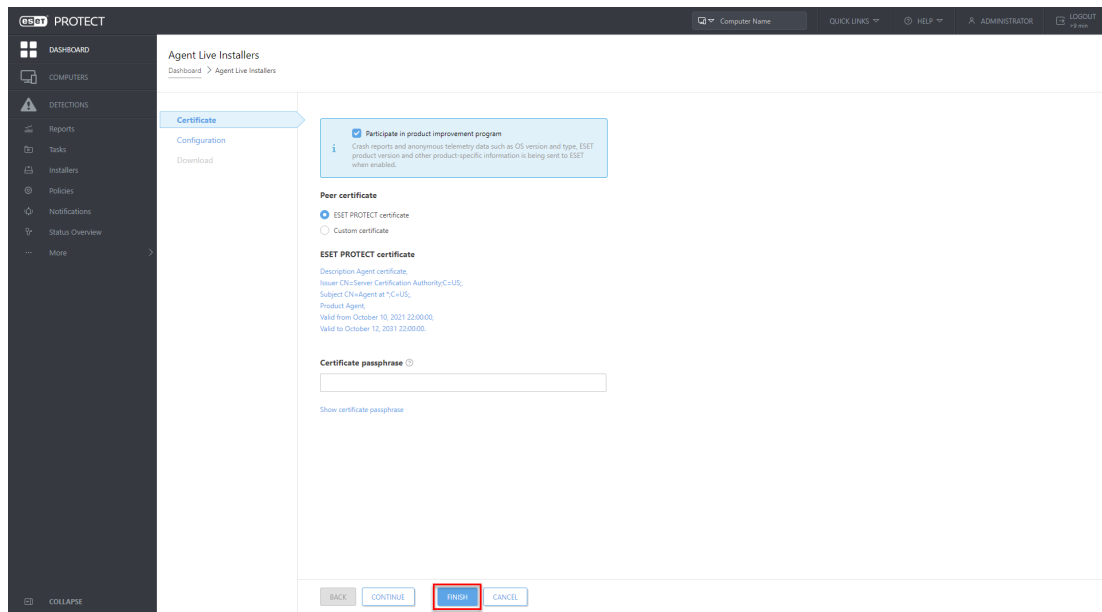

III. [Run an installation task in ESET PROTECT](#)

## I. Create ESET Management Agent Live Installer in ESET PROTECT

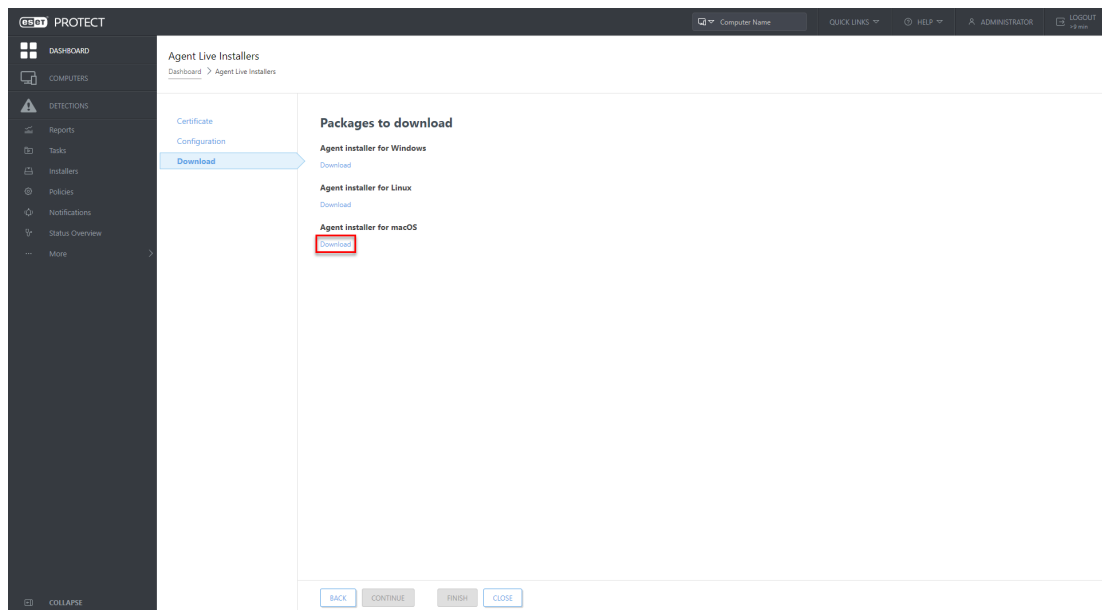

1. [Open the ESET PROTECT Web Console](#) in your web browser and log in.
2. Click **Quick Links** → **Other Deployment Options**.
3. Select the radio button next to **Create Agent Live Installer** and click **Create Installer**.

4. Click **Finish**. Optionally, type **Certificate passphrase** or click **Configuration** for more settings of the Agent Live Installer.

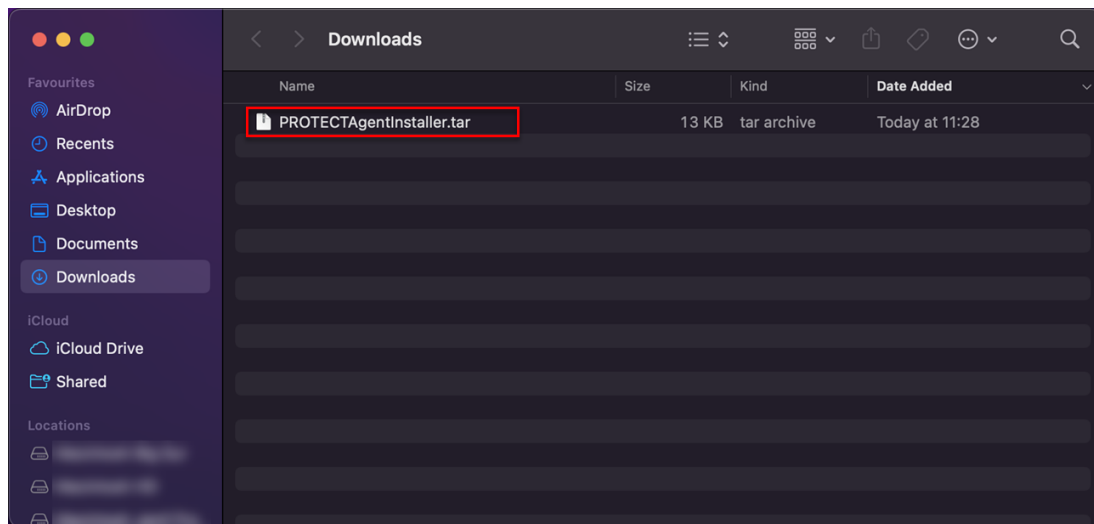

5. Click **Download** under **Agent Installer for macOS**.

## II. Install ESET Management Agent on your macOS computer

1. Transfer the **PROTECTAgentInstaller.tar** file to your macOS computer and double-click it to extract the **PROTECTAgentInstaller.tar** script.

2. Type the command `[LOCATION]/PROTECTAgentInstaller.sh`, where `[LOCATION]` is the path to the file and press **Enter**.

3. Wait for the installation to finish. Your macOS computer should appear in the ESET PROTECT Web Console.

### III. Run an installation task in ESET PROTECT

[Run a software installation task in ESET PROTECT.](#)
