## Install ESET Rogue Detection Sensor on a different computer than ESET Security Management Center Server (7.x)

Anish | ESET Nederland - 2018-09-12 - Comments (0) - Installation

### Issue

- When using the ESET Security Management Center (ESMC) Virtual Appliance, you can install ESET Rogue Detection Sensor on a client computer to detect other clients that are not protected by ESET products

### Details

#### Solution

#### Prerequisites

- The computer on which you plan to install ESET Rogue Detection Sensor (ESET RD Sensor) must have the ESET Management Agent installed. [Click here for step-by-step instructions to install the ESET Management Agent.](#)
- The computer on which you plan to install RD Sensor must have [WinPcap](#) installed.

---

### Solution

1. Click the appropriate link below to download the ESET RD Sensor installer file.  
[64-BIT DOWNLOAD](#) [32-BIT DOWNLOAD](#)
2. Double-click the installer file (**RDSensor\_x64.msi** or **RDSensor\_x86.msi**).
3. Click **Next**.

#### Figure 1-1

1. Read the End User License Agreement. If you agree to the terms, select the check box next to **I accept the terms in the License Agreement** and then click **Next**.

#### Figure 1-2

1. Deselect the check box **Participate in product improvement program** if you do not agree to send crash reports and telemetry data to ESET. If the check box is left selected, telemetry data and crash reports will be sent to ESET. Click **Next**.

### Figure 1-3

2. Click **Next**.

### Figure 1-4

1. Click **Install**.

### Figure 1-5

1. Click **Finish**. Once the client computer checks into the ESET Security Management Center Server (ESMC Server), ESET RD Sensor on the client will begin reporting rogue computers to your ESMC Server.
