Install ESET Security Management Center on a Domain Controller or Microsoft Small Business Server (7.x)

Anish | ESET Nederland - 2018-09-12 - Comments (0) - Installation

[Details](#)

Solution

Prerequisites

- Make sure that your system meets the [system requirements for ESET Security Management Center \(ESMC\)](#).
- Visit the [ESET Security Management Center All-in-one installer download page](#), select the appropriate installer file for your system and click **Download**. When it is finished downloading, extract the .zip file to an easy-to-find location.

This solution is divided into three parts, click each part to expand the step-by-step instructions.

[I. Install SQL Express manually](#)[II. Allow TCP/IP connections to the SQL database](#)[III. Install ESET Security Management Center Server](#)
