[KB6062] "Offline units connected" warning in ESET License Administrator

Ondersteuning | ESET Nederland - 2025-03-07 - [Comments \(0\)](#) - [Legacy ESET Remote Administrator \(6.x / 5.x / 4.x\)](#)

Issue

You used an offline license file to activate a computer that has internet access and is able to contact edf.eset.com

You see an **Offline units connected** warning in the Dashboard of ESET License Administrator

The screenshot shows the ESET License Administrator Dashboard. At the top, there's a warning banner: "Offline units connected. Please use online licenses for units that connect to the network." Below this, a table lists bundled products. The first row is "ESET Endpoint Security + File Security" with a status of "1 / 4 (1 offline)". In the "Offline file" column, there is a red button labeled "1 offline + 1". A red arrow points to this button.

PRODUCT NAME	STATUS	UNITS	OFFLINE FILE
ESET Endpoint Security + File Security	⚠	1 / 4 (1 offline)	1 offline + 1

You attempt to generate another offline license file by clicking **Offline** label in the **Offline file** column and receive an **Offline units are connected to the internet** warning

The screenshot shows a warning dialog box titled "Offline units are connected to the internet". It contains a red warning icon and the text: "Units activated via offline license file have been connecting to the internet and should be activated with the regular license." There is a "CLOSE" button at the bottom right.

Details

Solution

1. Click **Unit Management**, click the name of the computer the ESET product is installed and activated on (using an offline license file) and then select **Deactivate**.

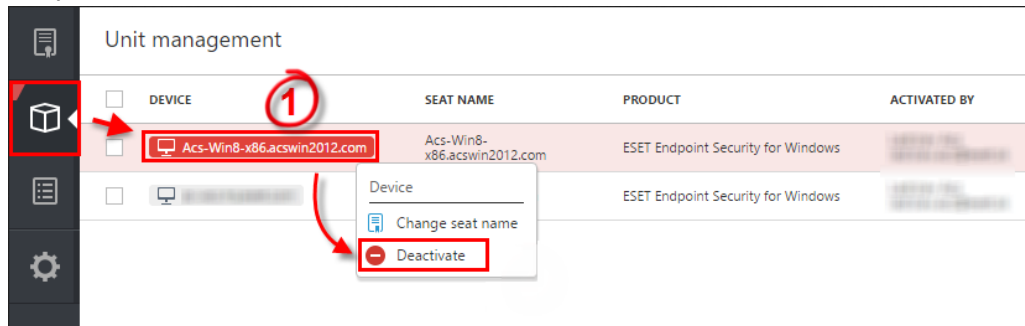

Figure 1-1

Click the image to view larger in new window

2. Click **Yes** to confirm the unit deactivation.

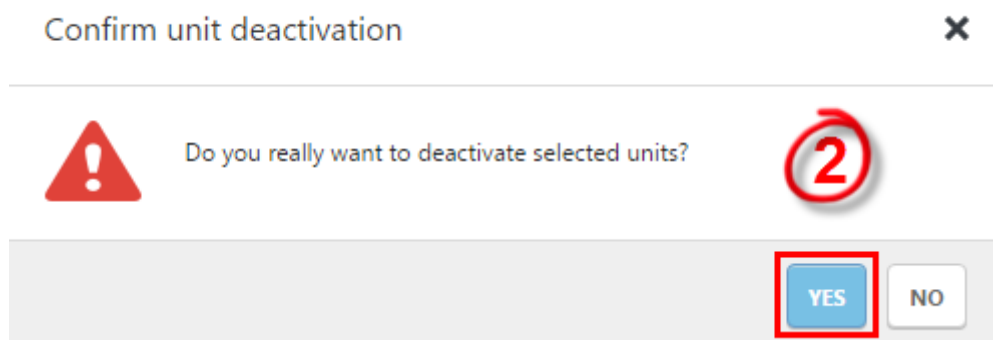

Figure 1-2

3. [Activate the ESET product](#) on the machine using the **License Key** you received after purchasing your ESET license.

Offline environments

If the computers hosting ESET products are supposed to remain offline (no connection to the internet and virus signature database updates are distributed using the [mirror tool](#)), [activate these computers using an offline license](#).
