Manage ESET Security for Microsoft SharePoint Server using ESET Remote Administrator

Ondersteuning | ESET Nederland - 2017-11-27 - Comments (0) - Legacy ESET Remote Administrator (6.x / 5.x / 4.x)

<https://support.eset.com/kb3316>

ESET Remote Administrator (ERA) version 5.x and earlier: [Click here for instructions](#).

Manage ESET Security for SharePoint version 6.x using ERA (version 6.x)

To manage ESET Security for Microsoft SharePoint Server 6.x with ESET Remote Administrator (ERA) version 6.x:

1. [Install ERA](#). If ERA is already installed on your network, verify the [ERA Agent is installed and successfully communicating with the ERA Server](#).

1. [Create a new policy](#).

In the **Select product** drop-down menu, select **ESET Security for Microsoft SharePoint Server (V6+)**.

Manage ESET Security for SharePoint version 4.5 using ERA (version 5.x)

1. Click **Start** → **All Programs** → **ESET** → **ESET Security** → **ESET Security** to open the main program window.
2. In ESET Security for Microsoft SharePoint Server, press **F5** to open Setup and then expand **Miscellaneous** → **Remote**

administration.

3. Select the check box next to **Connect to Remote Administrator server** and type the IP address of your ERA server into the **Server address** field.
4. If your ERA server requires a password for clients to check-in, select the check box next to **Remote Administrator server requires authentication** and type in your password.
5. Click **OK** once you are finished. You can now manage ESET Security for Microsoft SharePoint Server using ESET Remote Administrator Console.
