Monitor clients Full Disk Encryption status

Steef | ESET Nederland - 2020-01-13 - Comments (0) - ESET Full Disk Encryption

Issue:

You would like to monitor the Encryption status of your clients

Solution:

Create the following dynamic group templates and groups in ESMC:

1. EFDE installed, this group checks if ESET Full Disk Encryption is installed on the client:

Configure the following expression:

Edit Dynamic Group Template

Dynamic Group Templates > Edit Dynamic Group Template

Basic

Expression

Summary

OPERATION   AND (All conditions have to be true)   ▼

Computer . Managed products mask   is one of   ▼   Other: ESET Full Disk Encryption

Add Rule

BACK   CONTINUE   FINISH   SAVE AS...   CANCEL

2. Create the dynamic group template , Encrypted true

Edit Dynamic Group Template

Dynamic Group Templates > Edit Dynamic Group Template

Basic

Expression

Summary

Name

Encrypted true

Description

Tags

Select tags

BACK   CONTINUE   FINISH   SAVE AS...   CANCEL

Choose for the NAND operater with the following expression:

3. Create the dynamic group template, Encryption false

Configure the following expression:

Edit Dynamic Group Template

Basic

Expression

Summary

| OPERATION | AND (All conditions have to be true) ▼ |

Functionality/Protection problems . Problem	is one of ▼	Computer not encrypted 🗑
		Computer is decrypting 🗑
		Computer is encrypting 🗑
		Add

Add Rule

BACK   CONTINUE   FINISH   SAVE AS...   CANCEL

Create the dynamic groups and link the above dynamic group templates, make sure the Encryption = true and the Encryption = false are nested in the EFDE installed group. See the example below:
