Run a component-based (custom) installation of ESET endpoint products from ESET Security Management Center (7.x)

Anish | ESET Nederland - 2018-09-14 - Comments (0) - ESET Security Management Center

Issue

- Install only certain components of ESET Endpoint Security on client workstation(s)

Typical push installations

If you want to perform a typical push installation, see the following Knowledgebase article:

- Deploy or upgrade ESET endpoint products using ESET Security Management Center (7.x)

Solution

Before proceeding

Before running a software install task, make sure that the ESET Management Agent is installed on the target computers.

1. Open ESET Security Management Center Web Console (ESMC Web Console) in your web browser and log in.
2. Click **Client Tasks**, expand **Operating System**, click **Software Install → New**.

Figure 1-1
Click the image to view larger in new window

1. In the **Basic** settings section, give your installation task a **Name** and optionally a **Description**.
The **Task** drop-down menu will automatically be set to **Software Install**.

Click the image to view larger in new window

1. Click the **Settings** section and click **<Choose ESET License>**.

Figure 1-3
Click the image to view larger in new window

1. Select the appropriate license for the ESET product you will deploy to clients and then click **OK**. If you have not yet added product licenses, click here for instructions to add product licenses in ESMC.

1. Choose a **Package to install** option. You can choose **Install package from repository** or **Install by direct package URL** to select the package that will be installed on target clients:

If you are upgrading to Windows 10, Install by direct package URL

To ensure that clients on your network receive the latest Windows 10-compatible version of your ESET endpoint product, enter the appropriate URL for your ESET endpoint product(s) in the **Install by direct package URL** field:

ESET Endpoint Security 7

- 32-bit: https://download.eset.com/com/eset/apps/business/ees/windows/latest/avremover_ees_nt32_enu.exe
- 64-bit: https://download.eset.com/com/eset/apps/business/ees/windows/latest/avremover_ees_nt64_enu.exe

ESET Endpoint Antivirus 7

- 32-bit: https://download.eset.com/com/eset/apps/business/eea/windows/latest/avremover_eea_nt32_enu.exe
- 64-bit: https://download.eset.com/com/eset/apps/business/eea/windows/latest/avremover_eea_nt64_enu.exe
- **Install package from repository**
  To install a package from the repository, select **Install package from repository** and click **<Choose Package>**. Select the ESET product that you want to install on client computers and then click **OK**. Do I have the latest version of ESET business products? Select the check box next to **I agree with the application End User License Agreement and acknowledge the Privacy Policy**.

Figure 1-5
Click the image to view larger in new window

- **Install by direct package URL**
  To install a package by entering the target URL, select **Install by direct package URL** and type the package URL into the corresponding field. Check for the latest version of ESET business products. Select the check box next to **I accept the terms of application End User License Agreement**.

1. Click **Finish** when you are finished making changes to your task.

2. Click **Create Trigger** when you are asked whether you want to add a trigger for the client task. For instructions to assign a trigger to a **Client Task**, see the following ESET Knowledgebase article:

    - Create a Trigger and add Target computers or groups to execute a Client Task (ESMC 7)
