Run a component-based (custom) installation of ESET endpoint products from ESET Security Management Center (7.x)

Anish | ESET Nederland - 2018-09-14 - Comments (0) - ESET Security Management Center

lssue

• Install only certain components of ESET Endpoint Security on client workstation(s)

Typical push installations

If you want to perform a typical push installation, see the following Knowledgebase article:

• Deploy or upgrade ESET endpoint products using ESET Security Management Center (7.x)

Solution

Before proceeding

Before running a software install task, <u>make sure that the ESET Management Agent is</u> <u>installed</u> on the target computers.

- 1. <u>Open ESET Security Management Center Web Console</u> (ESMC Web Console) in your web browser and log in.
- 2. Click Client Tasks, expand Operating System, click Software Install → New.

×

Figure 1-1

Click the image to view larger in new window

 In the Basic settings section, give your installation task a Name and optionally a Description. The Task drop-down menu will automatically be set to Software Install.

×

 Choose a Package to install option. You can choose Install package from repository or Install by direct package URL to select the package that will be installed on target clients:

If you are upgrading to Windows 10, Install by direct package URL

To ensure that clients on your network receive the latest Windows 10-compatible version of your ESET endpoint product, enter the appropriate URL for your ESET endpoint product(s) in the **Install by direct package URL** field:

ESET Endpoint Security 7

• 32-

bit: https://download.eset.com/com/eset/apps/business/ees/windows/latest/avremove r_ees_nt32_enu.exe

• 64-

bit: https://download.eset.com/com/eset/apps/business/ees/windows/latest/avremove r_ees_nt64_enu.exe

ESET Endpoint Antivirus 7

• 32-

bit: https://download.eset.com/com/eset/apps/business/eea/windows/latest/avremove r_eea_nt32_enu.exe

• 64-

bit: https://download.eset.com/com/eset/apps/business/eea/windows/latest/avremove r_eea_nt64_enu.exe

• Install package from repository

To install a package from the repository, select **Install package from repository** and click **<Choose Package>**. Select the ESET product that you want to install on client computers and then click **OK**. <u>Do I have the latest version of ESET</u> <u>business products?</u> Select the check box next to **I agree with the application End User License Agreement and acknowledge the Privacy Policy**.

Figure 1-5

Click the image to view larger in new window

• Install by direct package URL

To install a package by entering the target URL, select **Install by direct package URL** and type the package URL into the corresponding field. <u>Check for the latest</u> <u>version of ESET business products.</u> Select the check box next to **I accept the terms of application End User License Agreement**.

×

- 1. Click **Finish** when you are finished making changes to your task.
- Click Create Trigger when you are asked whether you want to add a trigger for the client task. For instructions to assign a trigger to a Client Task, see the following ESET Knowledgebase article:
 - <u>Create a Trigger and add Target computers or groups to execute a Client</u> <u>Task (ESMC 7)</u>
