Uninstall ESET endpoint or server products (6.x)

Ondersteuning | ESET Nederland - 2020-07-13 - Comments (0) - Legacy ESET Remote Administrator (6.x / 5.x / 4.x)

Issue

- Uninstall ESET Endpoint Security, ESET Endpoint Antivirus, ESET File Security or ESET Mail Security

Solution

A new version has been released

Version 7 of ESET business products were released on August 16, 2018. This article applies to version 6.x and ESET Remote Administrator . For information about what's new in the latest version and how to upgrade, see the following article:

- [What's new in version 7 business products?](#)

ESET Remote Administrator (ERA) users: [Perform these steps in ERA](#)

Mac Users: [Uninstall ESET Endpoint for macOS products.](#)

In situations where you do not want to, or cannot use a [push uninstall](#) to remove an ESET endpoint or server solution, follow the steps below to uninstall on an individual client or server workstation.

A restart may be required

If you are performing these steps on a server, we recommend that you plan a maintenance window to allow for a restart after removing your ESET product.

1. Press the **Windows key**  + **R** to open a **Run** dialog.
2. Type **Appwiz.cpl** into the field and click **OK**.
3. In the **Uninstall or Change a program** window, select the ESET product you want to remove and click **Change**.
