What are the encryption size constraints?

Anish | ESET Nederland - 2018-02-16 - Comments (0) - ESET Endpoint Encryption

The following table details the maximum file sizes of the various encryption features of DESlock+.

Feature	Maximum Size
Full Disk Encryption	No limit ¹
Removable Media Encryption	No limit ^{1 + 4}
DESlock+ Go	Maximum size of 4 GB per file by Microsoft WebDAV services ³
File Encryption (.dlp files) ²	Maximum size of 3.99 GB
Text and Clipboard Encryption	Maximum size of 3.99 GB, this may be further limited by the text container used
Archives (.dpk files)	Maximum size of archive 4 GB, maximum size of individual files within archive 2 GB
Virtual disks (.mnt, .dlpvdisk)	Maximum size of 2 TB on NTFS/exFAT drives, 4 GB on FAT32
Folder Encryption	No limit ¹

¹ No limit imposed by DESlock+, Operating system/hardware limits still apply

² Applies to file encryption, email attachments, DESlock+ Reader and DESlock+ Mobile
