When upgrading to ESET Remote Administrator 5.x, how do I create a new policy using settings from ESET Remote Administrator 4.x and earlier?

Ondersteuning | ESET Nederland - 2025-03-07 - Comments (0) - 5.x

https://support.eset.com/kb3025

Details

The ESET Configuration Editor is different in ESET Remote Administrator 5 than in previous versions, with separate branches for version 4 and version 5 settings. The Policy Migration Wizard, available in ESET Remote Administrator Console 5.1 and later, makes it easy to transfer the settings from your Windows product line v3 and v4 policy into a new policy and apply them to v5 and later client workstations.

Solution

1. Upgrade ESET Remote Administrator to the latest version
2. Run the Policy Migration Wizard
