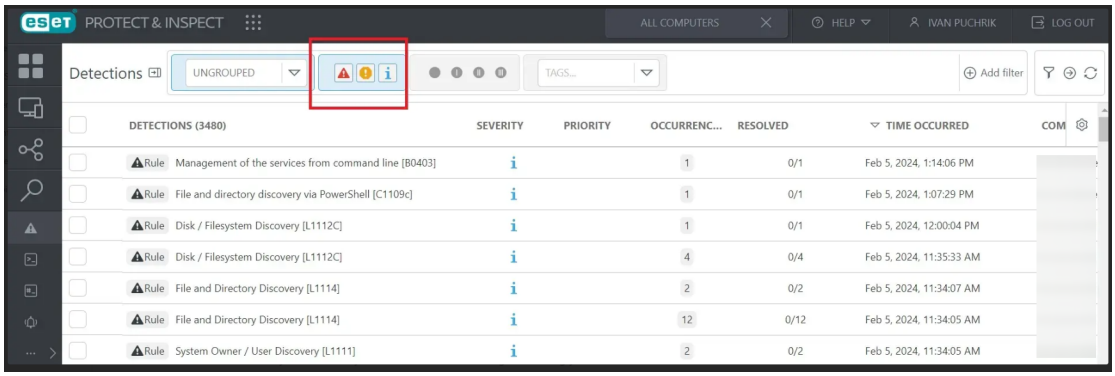
Announcement: ESET INSPECT - Enabling non-optional rules; Warning level only

2024-03-07 - Steef | ESET Nederland - Comments (0) - Customer Advisories

One of our goals is to make a full transition towards Incident Centricity where the main workflow is with Incidents. For this reason, we need to increase the number of inputs for our algorithms, and **it will be done by enabling of the non-optional rules: Warning severity level only and only in Cloud instances.**

After internal testing and observation, we state that enabling of the non-optional rules **should not lead to significant noise increase in Detection view and also to not have significant impact to Syslog.**

In case you do not want to display it, you can quickly filter out the levels by using these quick filters:



We will begin enabling it on Monday, the 11th of March, and will continue in batches.
