Customer Research: E-mail Security Research

2022-12-21 - Mitchell | ESET Nederland - Comments (0) - Other News

We would like to invite you to participate in the E-Mail Security survey about the e-mail server setup you are using and your product preferences.

We are looking for direct feedback from customers to influence the future development of all future server e-mail-related products. If you are an IT administrator, a security administrator, or someone responsible for setting up e-mail accounts, your opinion is very precious to us.

You can participate in the survey by visiting our ESET Customer Research Landing Page, where you can regularly find surveys running at ESET. The surveys should take no longer than 5-10 minutes to finish.

Thank you for your time and support.
