ESET Endpoint Encryption version 5.2.54.0 has been released

2024-04-16 - Steef | ESET Nederland - Comments (0) - Servicing release

ESET Endpoint Encryption (EEE) version 5.2.54.0 has been released and is available in the Web Console repository.

Changelog:

- Fixed: Keyboard layouts that did not adhere to the caps lock rules for number keys within the bootloader, for example, French and German
- Fixed: A problem where text in the bootloader would be corrupted in some languages
- Fixed: A problem where the user interface did not scale properly when displaying a DPI set above 100%
- Fixed: A problem where an encrypted email would only be auto-decrypted on the first viewing
- Fixed: A problem where the Enter key would not move focus to the next interactable element in the bootloader

Upgrade Clients to the Latest Version

Upgrade clients on your network to the latest version using ESET PROTECT or ESET PROTECT On-Prem.
