ESET Endpoint Security and ESET Endpoint Antivirus version 6.6.2072 have been released

2018-01-19 - Perry | ESET Nederland - Comments (0) - Servicing release

ESET Endpoint Antivirus and ESET Endpoint Security version 6.6.2072 have been released.

This release resolves an issue with product activation, downloading updates or LiveGrid errors experienced with version 6.6.2068.

Changelog:

Fixed: Unable to download updates and LiveGrid problem after successful product activation associated with the error messages "Your license file does not contain a Username or Password" or "ESET LiveGrid is not accessible"

Fixed: Corrupted UI is being displayed when on-demand scan is launched from context menu and UI configured to start in minimal mode

Fixed: Security hardening in Self-defense, SMB share scanning and script monitoring modules

Upgrade Clients to the Latest Version

Updated builds of ESET endpoint products are available from the ESET Remote Administrator repository and the ESET [download page](#).

To upgrade clients on your network to the latest version, [send an upgrade task to clients](#), or distribute the installer file to clients and [run a local installation](#).

Known Issues
