ESET Full Disk Encryption (EFDE) version 1.4.62.0 has been released

2024-04-03 - Steef | ESET Nederland - Comments (0) - Releases

ESET Full Disk Encryption (EFDE) version 1.4.62.0 has been released and is available in the Web Console repository.

Changelog:

- Added: Repository load balancing support for automatic updates.
- Improved: Added crash dump support for the AIS service.
- Fixed: Keyboard layouts that did not adhere to caps lock rules for number keys within the bootloader. For example, French and German.
- Fixed: A problem where the AIS service would crash due to insufficient local system permissions to the service control manager.
- Fixed: A problem where the Enter key on the keyboard would not move focus to the next interactable element in the bootloader.

Upgrade Clients to the Latest Version

Upgrade clients on your network to the latest version using ESET PROTECT or ESET PROTECT On-Prem.
