ESET Full Disk Encryption version 2.1.12.0 has been released

2025-03-18 - Steef | ESET Nederland - Comments (0) - Feature release

ESET Full Disk Encryption version 2.1.12.0 has been released.

Changelog

- NEW: Used space encryption mode. Speeds up encryption and decryption by encrypting only the disk space that contains data.
- NEW: Hardware support for AES-NI which improves encryption performance and decreases CPU load.
- NEW: Now supports Microsoft Direct Storage for non-encrypted disks.
- IMPROVED: Further improvements to Full Disk Encryption performance during encryption and regular use such as initial encryption and R/W speeds.
- IMPROVED: Reduced the time taken to display the pre-boot authentication screen by 10 seconds on certain Lenovo laptops, such as the T14 Gen3 and T16 Gen2 models.
- FIXED: A problem where when ESET Secure Authentication was used on an Encrypted device using an SSO login, ESA would not prompt the user for their 2FA code.
- FIXED: A problem on Windows 24H2 where a system would not shutdown.
- FIXED: A problem on Windows 24H2 where a user would be signed out when attempting to hibernate the system.
- FIXED: A problem where the pre-boot SSO password would not be synchronized when the user changed their password from Windows.
- FIXED: If the password age policy was set, users with SSO were incorrectly prompted to change their password when it expired. Windows password rules apply when using SSO.
- FIXED: A problem where SSO would not work when resuming from hibernate.
- FIXED: A problem on some Dell devices where the pre-boot screen would pause before input was accepted.

Schedule for automatic updates

- **Phase one:** 50% throttling, starts on 1st of April 2025
- **Phase two:** 100% throttling, starts on 15th of April 2025
