ESET Full Disk Encryption version 2.3.5.0 has been released

2025-12-16 - Steef | ESET Nederland - Comments (0) - Feature release

ESET Full Disk Encryption version 2.3.5.0 has been released.

Changelog

- NEW: Ability to migrate ESET Endpoint Encryption to ESET Full Disk Encryption without decrypting.
- NEW: Ability to automatically pause authentication when rebooting to perform Windows updates.
- IMPROVED: Resume from hibernate speed when encrypted has been significantly increased.
- IMPROVED: The pre-boot environment now utilizes AES-NI where possible to enhance boot times.
- IMPROVED: Full Disk Encryption is now compatible with Windows Memory Integrity mode (HVCI).
- IMPROVED: Pre-boot environment now displays password requirements when changing a password.
- IMPROVED: Initial NUM_LOCK state is preserved when booting an encrypted system.
- IMPROVED: Pre-boot user is forced to change their password if policy changes and their password does meet requirements.
- IMPROVED: EFDE logo is no longer displayed after pre-boot authentication; instead, the boot screen is restored with the manufacturer logo.
- IMPROVED: Improvements to keyboard, touch screen and USB detection in pre-boot environment.
- FIXED: DELL 7400 and 5000 series laptops could fail to resume from hibernate.
- FIXED: Using Single Sign-on could cause RDP sessions to require login credentials twice.
- FIXED: When using SSO, Windows password changes now sync correctly in all locales.
- FIXED: Correct status message now displayed when laptop is on battery power.
- FIXED: When launched from command line, the ESET Full Disk Encryption service no longer launches a new instance.
- FIXED: When using SSO, the pre-boot screen no longer truncates long usernames.
- FIXED: EFDE Service could crash if a wildcard * was used in the max update version policy.

- FIXED: Install repair mode now works when the original installation media is not available.
