ESET Full Disk Encryption version 2.4 has been released

2026-07-15 - Steef | ESET Nederland - [Comments \(0\)](#) - [Feature release](#)

A feature update of ESET Full Disk Encryption version 2.4 has been released

Changelog

- **NEW:** Added support for the Microsoft UEFI CA 2023 certificate, helping ensure compatibility with the latest platform security requirements.
- **IMPROVED:** Support for partition layout changes on encrypted disks. Including Windows 11 recovery partition resizing scenarios.
- **IMPROVED:** Ability to repair disk layout discrepancies, where layout had been changed before support was introduced.
- **IMPROVED:** Updated product terminology to align with current ESET subscription and licensing terminology.
- **IMPROVED:** Improved service reliability during startup.
- **FIXED:** Fixed several issues affecting encrypted secondary drives, including problems that could cause drives to become inaccessible after restart or data corruption during encryption.
- **FIXED:** Fixed an issue where automatic updates were not working.
- **FIXED:** Fixed an issue where the encryption status of a device could be reported incorrectly by products using the OPSWAT integration, following an upgrade or repair.
