Release Announcement ESET Inspect version 2.0.3537.0

2023-12-11 - Steef | ESET Nederland - Comments (0) - Releases

ESET Inspect version 2.0.3537.0 has been released. The roll-out began at December 6, 2023. Cloud instances will be down anywhere from roughly 5 minutes to 3 hours based on their database size. The new Rule module will be released gradually to instances during the week.

Changelog

- NEW: ESET Inspect Cloud has been renamed to ESET Inspect
- NEW: Dashboard for incident management
- NEW: Automatic and Manual remediation of incidents
- NEW: Raw event transfer through a cloud blob storage
- NEW: Ukranian, Simplified Chinese and Japanese language support.
- CHANGED: UI visuals to reflect new branding changes
- IMPROVED: Flood prevention improvements
- IMPROVED: Rule module - Users can now enable/disable new rules directly from the settings menu, independent of server release
- IMPROVED: Users can now use a setting to automatically execute remediation actions specified by rules

Renaming of existing products

Some ESET business products are being renamed. Product renaming will occur with upcoming releases, but there may be instances where the product name displays inconsistently in the product UI, documentation, or other properties.

Current name	New name
ESET Inspect	ESET Inspect On-Prem
ESET Inspect Cloud	ESET Inspect
ESET PROTECT	ESET PROTECT On-Prem
ESET PROTECT Cloud	ESET PROTECT
ESET Secure Authentication	ESET Secure Authentication On-Prem
ESET Secure Authentication Cloud	ESET Secure Authentication

Support resources
