ESET LiveGuard Advanced scheduled maintenance

2023-03-20 - Mitchell | ESET Nederland - Comments (0) - Customer Advisories

Please be aware that on March 21, 2023, between 5:00 PM - 8:00 PM UTC the ESET LiveGuard Advanced operation team will conduct a scheduled maintenance that will cause customers not to receive the results from sent samples. The aggregated downtime time should add up to around 40 minutes within the 3-hour maintenance window. The maintenance is required in order to bring new functionality in the future. Samples sent during the downtime will be queued and their results will be delivered once the maintenance is over.
