ESET PROTECT Hub version 1.11.1 has been released

2025-03-20 - Steef | ESET Nederland - Comments (0) - Feature release

ESET PROTECT Hub version 1.11.1 has been released.

Changelog

New features and improvements:

- NEW: Preparations are needed to enable BETA functionality for SSO domain login via Microsoft Entra ID before the official commercial launch.
- NEW: When a customer attempts to self-register a new company into EPH using an email associated with an ESET Business Account or ESET MSP Administrator, the navigation wizard will not explain the unsuccessful action due to security reasons. Instead, an email will be sent explaining that this action is not possible and that the user must wait for the transition toESET PROTECT Hub.
- IMPROVED: For users with access to multiple companies, the strictest password expiration settings from any company will be applied.
- IMPROVED: Enhanced cloud console activation wizard. The language of ESET PROTECT Hub is now pre-selected for new cloud consoles. For ESET Inspect, where only English is available, English is pre-selected.

Bug fixes:

- FIXED: Users can no longer turn off 2FA authentication in their profile settings if the superuser of the company has enforced 2FA for all users.
- FIXED: License usage displayed in the Licenses tab now correctly matches the information shown on the Dashboard in the License tile.
- FIXED: After refreshing the ESET PROTECT Hub, modified user privileges in Hub are now automatically applied.
- FIXED: All users with read/write rights for a specific Site are now visible in the Site page details.
