ESET Secure Authentication (cloud) version 4.15.1.0 has been released

2025-05-01 - Steef | ESET Nederland - Comments (0) - Feature release

We have successfully released version 4.15.1.0 of ESET Secure Authentication (cloud) in all datacenters, including Components for Windows and Synchronization Agent.

Changelog:

- ADDED: Windows Server 2025 support
- IMPROVED: Reports, dashboards, and tables loading performance
- IMPROVED: Create User button is now displayed but disabled when Realm is not selected, Delete button disabled with explanation in integrated AD realms
- IMPROVED: Dashboards UI - line height, empty space diminished, dark mode improvements, titles
- FIXED: Deactivated company or company with expired trial licenses cannot be reactivated after transition to paid license - Refresh button updates the state (if not updated already based on reactivation in ESET PROTECT Hub)
- FIXED: User changes synchronization from Active Directory - user no longer deleted and created again when changing organizational units
- FIXED: Emails not sent from ESA
- FIXED: Usage of 2FA during release process not working
- FIXED: Windows login component installation successful but ESA Credential Provider Proxy service did not start
- FIXED: Displaying "NaN" instead of numbers in columns All users and Components columns in License Settings when having multiple companies
- FIXED: Deactivate API call does not clear OTP SMS units correctly
- FIXED: Redirect between DE and US datacenter doesn't work correctly in some case
- FIXED: Admin not redirected to login page after logout
- FIXED: Internal server error when using double backslash before username
- FIXED: Vulnerabilities in NuGet packages
- REMOVED: Virus Radar link in Help menu (EOL)
